Developed by a dermatologist.

Dear costumers,
Dear colleagues,

The grey time of the year is finally over and summer is waiting for us! Now it's time for our skin to get rid of the grey shroud too and prepare itself for the warm sun rays. You can find practical tips on this topic in this edition of our Beauty News.

Visiting your beautician now is an absolute highlight to professionally cleanse and care for your skin. What your skin needs now is an extra portion of moisture – that is why our popular Hyaluron^{HY+} Performance Serum is now also available in cabin size.

In order to allow the moisturizing agents to penetrate deeper into the skin, you should take advantage of instrument-based cosmetic treatments. An overview of the new types of treatments and their areas of application can be found on page 4.

We hope you enjoy reading this edition and wish you many sunny days. (Just don't forget to apply sunscreen!)

Instrument-based cosmetics

Modern and efficient treatment methods

Instrument-based treatment methods in cosmetics are largely based on the use of technical devices that increase the efficacy of the treatment. Thanks to technological advances, active ingredients can be applied to the skin in an even more effective way to solve skin problems more successfully.

Cleanse, refine, stimulate, regenerate, tighten: these are a few options instrument-based cosmetics offers these days. Using a wide range of technical devices, the treatments therefore constitute a considerable expansion to the range of treatments available. This does not mean, that manual cosmetic treatments are any less effective, but there are indeed skin conditions that can be treated more effectively using these new treatments. Beautiful skin does not appear by chance; it is the result of a comprehensive overall concept. Ask your beautician for the optimal treatment for you, tailored to the individual needs of your skin. Supported by the right home care products, you can pamper your skin at the highest level.

We have listed 4 exemplary treatment possibilities that can be used in combination with our derma.cosmetics skin care products to achieve excellent treatment results.

Radio frequency

For the radio frequency treatment, radio waves are used to precisely warm the tissue. The warming causes an immediate firming effect. The treatment can be used to smooth the skin of face and body.

Microdermabrasion is an effective treatment to exfoliate and remove dry or dead skin cells of the stratum corneum (upper layer). After the treatment, the skin is particularly receptive for skin care products. Microdermabrasion provides an improved skin appearance through refinement, regeneration and firming of the skin.

Microdermabrasion

Ultrasound

Ultrasound in cosmetics has a wide range of effects and deals with sound waves. Depending on frequency, intensity, duration or impulse sound, it can be applied as micro-massage, influence the spread of ingredients, serve as local warming or it can be used to increase cell processes. Due to the diverse fields of application, ultrasound can be used to treat wrinkles as well as dry, sensitive or impure skin and scars.

Cosmetic microneedling is a treatment that enables active ingredients to penetrate even deeper into the skin. This way, wrinkles and scars can be reduced.

Microneedling

Finally Summer!

Use these tips to get the perfect summer complexion

Say good bye to dry winter skin

Is your skin dry, flaky and has some rough areas? Then an exfoliating treatment would be particularly effective. That way, you can get rid of old skin cells and let your skin shine again. We highly recommend visiting your beautician. A skin care expert can cleanse the skin and prepare it optimally for the warm season. This way, your skin will radiate again.

Perfect Skin Peeling

The mild facial peeling gently removes excess sebum and dead skin cells from the skin.

Beauty from within

Drinking enough water is the ultimate beauty tip

Our body consists to 65% of water and that demonstrates how crucial a sufficient consumption of water can be. Drink two to four litres of water daily and your complexion will thank you! The skin will appear significantly firmer, smoother and, above all, more refreshed. Pep up your mineral water with lime, mint or ginger – the best way to reduce thirst on a hot summer day.

The best protection against the sun

Sunscreen is very important in order to protect the skin against harmful influences caused by UV radiation. We have 4 innovative care highlights for your individual sun protection!

Sensiderm Sun Cream mit SPF 50+

Optimal protection with SPF 50+ for sensitive skin. The cream combines a high level of protection with a great skin feeling. It is quickly absorbed and no sticky residue is left.

Solar+ Protect Fluid mit SPF 50+

The innovative sun fluid is an on-top product and applied above the daily care. It offers you the possibility of applying sun protection in an individual and flexible way, whenever it is needed.

Optimum Protection Cream mit SPF 20

The multifunctional cream provides protection against harmful environmental influences and stress factors. With a diverse range of skin care properties and a special texture, for all skin types.

Global Defense Cream mit SPF 20

Vitalizing day cream with comprehensive cell defense complex, infrared and UV protection. The active ingredient ELIX-IR™ helps to prevent the reduction of elastin and collagen caused by infrared rays, which also prevents premature skin aging.

Best Buddies

Sensiderm Sun Cream & Sensi Calm Ampoule

Nowadays, sensitive skin is the rule rather than the exception. More and more people classify their skin as sensitive and easily irritated. Redness, itching and a feeling of tension are some of the typical symptoms of sensitive skin.

Our **Sensiderm Sun Cream with SPF 50+** and the **Sensi Calm Ampoules** from the **Sensitive Series** by Dr. med. Christine Schrammek Kosmetik offer the perfect solution.

The **Sensiderm Sun Cream** has a very high level of UV protection – perfect for sunny summer months.

In order to calm stressed skin after spending time in the sun, **Sensi Calm Ampoule** offers an immediate help. A high dose of liquorice root, aloe vera and panthenol calms the skin and reduces swelling.

Think about it:

Everything that is good for the soul is usually pure stress for the skin. Hence, a responsible use of the sun and adequate care is essential.

Our special tip:

AloCalm Gel Mask. The versatile gel mask is based on highly concentrated aloe vera. The skin is intensively calmed and provided with moisture at the same time. Thanks to its cooling effect, the AloCalm Gel Mask is also perfectly applicable after an intense sunbathing session.

Dermatology meets cosmetics

60 years ago, the success story of the family company Dr. med. Christine Schrammek Kosmetik began in the heart of Essen, Germany. Beautician and founder Christine Schrammek was already highly acknowledged in cosmetic circles of experts even before founding her company (in Essen, Germany), thanks to her expertise and commitment. With the development of the original GREEN PEEL® Herbal Peeling Treatment and the popular Blemish Balm, the company firmly established itself in the cosmetic industry and became one of the most popular cosmetic brands worldwide among beauticians and users.

When dermatologist Dr. med. Christine Schrammek-Drusio joined the company founded by her mother, the medically inspired derma.cosmetics skin care range was born. High-end skin care products with the ability to tackle various skin problems – that is the promise of the first 'Dr. brand', where a dermatologist was behind the entire product development activities and the company itself.

Even today, Dr. med. Christine Schrammek Kosmetik follows the concept "dermatology meets cosmetics". Latest findings from the medical area are combined with particularly high-quality active ingredients, aiming to help people achieving a beautiful, healthy skin.

Hyaluron-

The anti-aging wonder

For years, hyaluronic acid has enjoyed increasing popularity in the beauty world. But why is hyaluronic acid so successful in helping to reduce wrinkles?

The gel-like liquid, which the body produces naturally, is found in the cells and intercellular space. One of the most important properties that makes hyaluronic acid so valuable is its ability to bind large amounts of water, thus increasing its volume many times over. This creates moisture deposits in the skin, which reduce the appearance of wrinkles by increasing the tension in the skin tissues. Unfortunately, the body produces less hyaluronic acid with age. If you do not want to accept this, simply give some hyaluronic acid back to your skin, for example with the popular HyaluronHY+ Performance Serum by Dr. med. Christine Schrammek Kosmetik.

"In the HyaluronHY+ Performance Serum, we use a combination of different types of hyaluronic acid. This boosts the body's own production of hyaluronic acid and inhibits its reduction. This way, we can achieve a unique and, above all, long-lasting boosting effect", explains Dr. med. Christine Schrammek-Drusio.

The anti-aging effect of the moisturizing serum is created by a range of different effects: While high-molecular hyaluronic acid stores the moisture on the surface of the skin and provides the appearance with reduced fine lines and wrinkles, short-chain hyaluronic acid penetrates into the deeper layers of the skin. The skin is plumped up from within – an effect that is visible immediately.

The **HyaluronHY+ Performance Serum** is also perfect for the use in instrument-based cosmetics, such as ultrasound treatments.

NEW
for the
cabin

The popular serum is now also available in professional size for the salon.

MoistureSonic Treatment

Moisture supply at its *highest* level

Moisture is the key factor for beautiful, firm and smooth skin. In contrast, a lack of moisture leads to dry, pale skin with a feeling of tension and wrinkles of dryness. In order to prevent these symptoms, the skin needs an extra portion of care.

Treatment duration

The MoistureSonic treatment is a real thirst quencher for skin in need of moisture. With this treatment, the intensively moisturizing and regenerating Hyaluron^{HY+} Performance Serum is worked into the skin using ultrasound technology. This provides long-lasting moisturizing effects, even in deeper layers of the skin tissue. Furthermore, fine lines and wrinkles are visibly reduced and the complexion is plumped up from within. Thanks to its high content of aloe vera (60%), hyaluronic acid and panthenol, using AloCalm Gel Mask as a highly effective ultrasound gel or a mask provides the skin with additional care. The combination of the high-quality skin care products with ultrasound technology allows your skin to appear stronger and fresher immediately after the treatment.

Treatment duration

Approximately 70 minutes

Treatment procedure

Cleansing – Peeling – Ingredient Concentrate – Ultrasound – Mask – Face Massage – Final Care

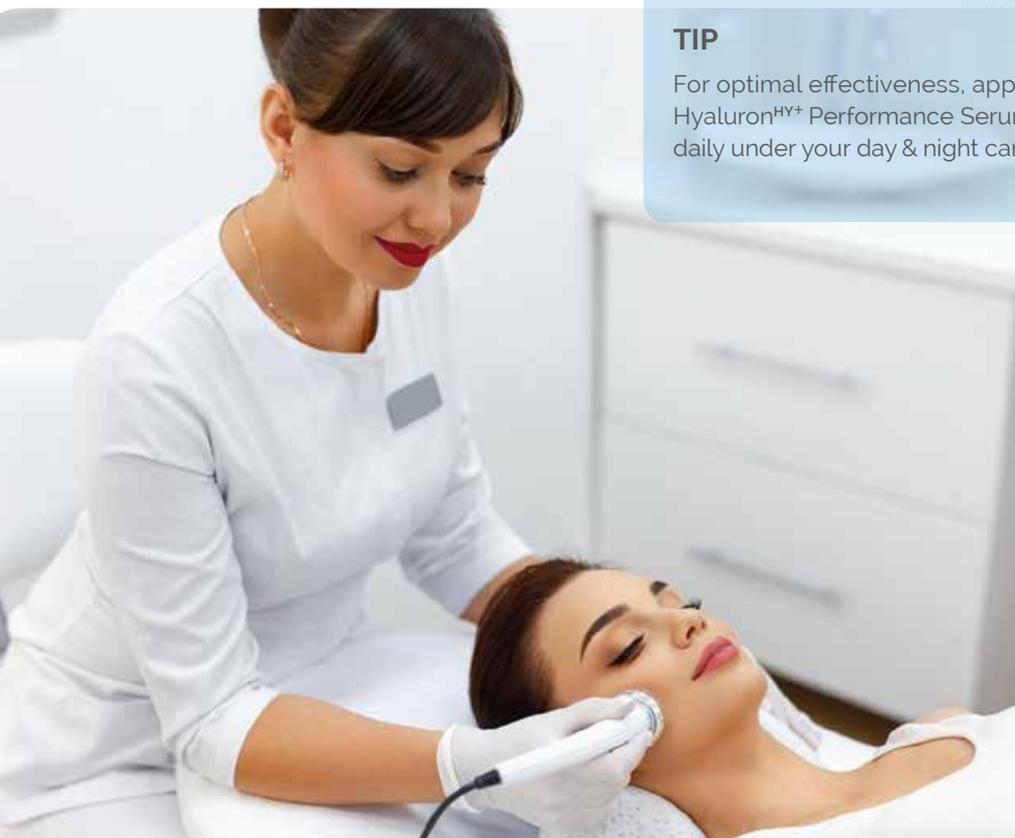

TIP

For optimal effectiveness, apply Hyaluron^{HY+} Performance Serum daily under your day & night care.

Care Recommendations:

The Hyaluron^{HY+} Performance Serum convinces with the perfect combination of highly effective moisturizing and regenerating ingredients. The use of hyaluronic acids with various molecular weights and other boosting factors ensures maximum efficacy. Moisture deposits are filled up, wrinkles of dryness are smoothed and the skin is plumped up from within. Perfectly suited for a skin that needs new freshness.

In the anniversary year, we'd like to take the opportunity to adequately celebrate the 60th birthday of the original GREEN PEEL® Herbal Peeling Treatment with you! That's why there was not only a giant GREEN PEEL® cake at this year's BEAUTY in Düsseldorf, but also little birthday muffins, live treatments, a GREEN PEEL® presentation and many other activities.

Our international partners celebrated the GREEN PEEL®'s birthday with us also. There is still a lot happening this year – celebrate with us!

CS Export Meeting 2018

Export Meeting Berlin

In mid-June, around 50 Dr. med. Schrammek partners from all over the world come together for our semi-annual Export Meeting taking place in the capital of Germany, Berlin, this year. Many partners do not mind traveling such a long distance and even come from Brazil, South Africa, Vietnam and New Zealand. Besides innovative and educational lectures, the programme is accompanied by a great social programme. We are looking forward to three packed days full of strategic topics, knowledge sharing and of course a lot of fun!

Make progress with advanced training

Across the world, education and advanced trainings are required for improving your personal and professional situation. With a training course at our Professional School for dermatological cosmetics, you will benefit in many different ways:

- A diverse range of training options
- Seminars available across the country
- Many years of experience
- Skilled trainers

Curious? Get in touch with us to find out about the latest seminars.

We look forward hearing from you
